### **DETAILED ACTION**

This is the second office action for U.S. Application 10/691,965 to White et al. on October 24, 2003. Claims 1, 2, 4, and 6-9 are pending. The indicated allowability of claim 1 is withdrawn. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4, and 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 claims "a sports pole mounting structure, comprising", but then claims the sports pole. Applicant should claim the mounting structure in combination with the sports pole.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,197,819 to Hughes. Hughes discloses a sports pole mounting structure with a ground sleeve (11) configured to be mounted in the ground and a support

Art Unit: 3632

member (47) mounted within the ground sleeve. There is a sports pole (29) and a bracket (61) attachable to the sports pole and engageable with the support member to support the sports pole and inhibit rotation of the sports pole. The bracket has a first and second protrusions (83) positioned to receive the support member therebetween. The racket has a first piece and a second piece that are secured together around the pole and joined by fasteners located on opposite sides of the pole. The protrusions extend substantially below the upper surface of the support member such that they inhibit rotation of the pole.

### ***Allowable Subject Matter***

Claims 6-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
